TOOL USED: MYSQL
BY SHAGUN

OBJECTIVE

- This project aims to strengthen SQL skills by solving real-world database queries using an Employee Management Database. The project consists of 100 SQL questions covering both basic and advanced concepts.

Current Progress

- Total Questions: 100
- Questions Solved: 30

BASIC SQL CONCEPTS IMPLEMENTED

- CREATE Database
- USE Database
- CREATE Table
- INSERT data
- SELECT Statements
- WHERE Clause
- DISTINCT
- ORDER BY
- LIMIT
- Aggregate Functions (COUNT, SUM, AVG, MIN, MAX)

CONCLUSION

This project has helped me build a strong foundation in SQL by solving practical database problems. So far, I have completed 30 SQL queries and plan to continue working toward advanced SQL concepts to enhance my data analytics skills.

The background features a white canvas with decorative elements. In the top-left corner, there is a light blue watercolor splash. The top-right corner is adorned with a solid blue abstract shape. The bottom-left corner contains a solid blue abstract shape, and the bottom-right corner features a light blue watercolor splash. Centered on the canvas is the text 'iTHANK you!' in a bold, dark blue font. The word 'i' is lowercase, while 'THANK' is uppercase. 'you!' is in a lowercase, cursive-style font.

iTHANK you!
