

Below are the answers for the first 30 SQL practice questions based on your Student table.

1. Display all records

```
SELECT * FROM Student;
```

2. Display only FirstName and LastName

```
SELECT FirstName, LastName  
FROM Student;
```

3. Show all unique courses

```
SELECT DISTINCT Course  
FROM Student;
```

4. Find all male students

```
SELECT *  
FROM Student  
WHERE Gender = 'Male';
```

5. Find all female students

```
SELECT *  
FROM Student  
WHERE Gender = 'Female';
```

6. Find students older than 20 years

```
SELECT *  
FROM Student  
WHERE Age > 20;
```

7. Find students younger than 21 years

```
SELECT *  
FROM Student  
WHERE Age < 21;
```

8. Find students whose age is exactly 20

```
SELECT *  
FROM Student  
WHERE Age = 20;
```

9. Find all students enrolled in BCA

```
SELECT *  
FROM Student  
WHERE Course = 'BCA';
```

10. Sort students by FirstName

```
SELECT *  
FROM Student  
ORDER BY FirstName;
```

11. Sort students by Age in descending order

```
SELECT *  
FROM Student  
ORDER BY Age DESC;
```

12. Count total students

```
SELECT COUNT(*) AS TotalStudents  
FROM Student;
```

13. Find the maximum age

```
SELECT MAX(Age) AS MaxAge  
FROM Student;
```

14. Find the minimum age

```
SELECT MIN(Age) AS MinAge  
FROM Student;
```

15. Find the average age

```
SELECT AVG(Age) AS AverageAge  
FROM Student;
```

16. Find the total of all ages

```
SELECT SUM(Age) AS TotalAge  
FROM Student;
```

17. Display the first 5 students

```
SELECT *  
FROM Student  
LIMIT 5;
```

18. Find students admitted after 15-Jun-2025

```
SELECT *  
FROM Student  
WHERE AdmissionDate > '2025-06-15';
```

19. Find students whose first name starts with 'A'

```
SELECT *  
FROM Student  
WHERE FirstName LIKE 'A%';
```

20. Find students whose last name ends with 'a'

```
SELECT *  
FROM Student  
WHERE LastName LIKE '%a';
```

21. Find students with a non-null email

```
SELECT *  
FROM Student  
WHERE Email IS NOT NULL;
```

22. Find students whose age is between 20 and 22

```
SELECT *  
FROM Student  
WHERE Age BETWEEN 20 AND 22;
```

23. Find students enrolled in BCA or MBA

```
SELECT *  
FROM Student  
WHERE Course IN ('BCA', 'MBA');
```

24. Find students whose age is not 20

```
SELECT *  
FROM Student  
WHERE Age <> 20;
```

25. Count male students

```
SELECT COUNT(*) AS MaleStudents  
FROM Student  
WHERE Gender = 'Male';
```

26. Count female students

```
SELECT COUNT(*) AS FemaleStudents
FROM Student
WHERE Gender = 'Female';
```

27. Sort students by admission date

```
SELECT *
FROM Student
ORDER BY AdmissionDate;
```

28. Show latest admitted students first

```
SELECT *
FROM Student
ORDER BY AdmissionDate DESC;
```

29. Display FirstName with alias Student_Name

```
SELECT FirstName AS Student_Name
FROM Student;
```

30. Display full name by combining first and last names

```
SELECT CONCAT(FirstName, ' ', LastName) AS FullName
FROM Student;
```

SQL Answers (Questions 31–60)

31. Count students in each course

```
SELECT Course, COUNT(*) AS TotalStudents
FROM Student
GROUP BY Course;
```

32. Count students by gender

```
SELECT Gender, COUNT(*) AS TotalStudents
FROM Student
GROUP BY Gender;
```

33. Find average age for each course

```
SELECT Course, AVG(Age) AS AverageAge
FROM Student
GROUP BY Course;
```

34. Find oldest student age in each course

```
SELECT Course, MAX(Age) AS OldestAge  
FROM Student  
GROUP BY Course;
```

35. Find youngest student age in each course

```
SELECT Course, MIN(Age) AS YoungestAge  
FROM Student  
GROUP BY Course;
```

36. Display courses with student counts in descending order

```
SELECT Course, COUNT(*) AS TotalStudents  
FROM Student  
GROUP BY Course  
ORDER BY TotalStudents DESC;
```

37. Find students whose first name contains 'a'

```
SELECT *  
FROM Student  
WHERE FirstName LIKE '%a%';
```

38. Find students whose last name contains 'h'

```
SELECT *  
FROM Student  
WHERE LastName LIKE '%h%';
```

39. Find students aged 20 or more and enrolled in BCA

```
SELECT *  
FROM Student  
WHERE Age >= 20  
AND Course = 'BCA';
```

40. Find female students older than 20

```
SELECT *  
FROM Student  
WHERE Gender = 'Female'  
AND Age > 20;
```

41. Find male students or MBA students

```
SELECT *  
FROM Student  
WHERE Gender = 'Male'  
OR Course = 'MBA';
```

42. Find students not enrolled in BCA

```
SELECT *  
FROM Student  
WHERE Course <> 'BCA';
```

43. Count distinct courses

```
SELECT COUNT(DISTINCT Course) AS TotalCourses  
FROM Student;
```

44. Display length of each student's first name

```
SELECT FirstName,  
LENGTH(FirstName) AS NameLength  
FROM Student;
```

45. Convert all first names to uppercase

```
SELECT UPPER(FirstName) AS FirstName  
FROM Student;
```

46. Convert all last names to lowercase

```
SELECT LOWER(LastName) AS LastName  
FROM Student;
```

47. Display current date

```
SELECT CURDATE();
```

48. Calculate days since admission for each student

```
SELECT FirstName,  
DATEDIFF(CURDATE(), AdmissionDate) AS DaysSinceAdmission  
FROM Student;
```

49. Find students admitted in June

```
SELECT *  
FROM Student  
WHERE MONTH(AdmissionDate) = 6;
```

50. Find students admitted in 2025

```
SELECT *  
FROM Student  
WHERE YEAR(AdmissionDate) = 2025;
```

51. Show courses having more than 2 students

```
SELECT Course,  
COUNT(*) AS TotalStudents  
FROM Student  
GROUP BY Course  
HAVING COUNT(*) > 2;
```

52. Find average age by gender

```
SELECT Gender,  
AVG(Age) AS AverageAge  
FROM Student  
GROUP BY Gender;
```

53. Show top 3 oldest students

```
SELECT *  
FROM Student  
ORDER BY Age DESC  
LIMIT 3;
```

54. Show top 3 youngest students

```
SELECT *  
FROM Student  
ORDER BY Age ASC  
LIMIT 3;
```

55. Show all courses having at least one student

```
SELECT Course,  
COUNT(*) AS TotalStudents  
FROM Student  
GROUP BY Course  
HAVING COUNT(*) >= 1;
```

56. Replace email domain with gmail.com

```
SELECT Email,  
REPLACE(Email, '@email.com', '@gmail.com') AS NewEmail
```

FROM Student;

57. Display first 3 characters of each first name

```
SELECT FirstName,  
SUBSTRING(FirstName, 1, 3) AS ShortName  
FROM Student;
```

58. Display average age rounded to 2 decimals

```
SELECT ROUND(AVG(Age), 2) AS AverageAge  
FROM Student;
```

59. Count students for each age

```
SELECT Age,  
COUNT(*) AS TotalStudents  
FROM Student  
GROUP BY Age  
ORDER BY Age;
```

60. Find students whose first name starts with 'R'

```
SELECT *  
FROM Student  
WHERE FirstName LIKE 'R%';
```
